

# Science

In Year 7, you will study four different units:

- An introduction to Science
- Biology
- Chemistry
- Physics

Your science teachers have prepared a set of worksheets which you will be expected to complete in your own time. It is important that you complete all the activities you are set to the best of your ability, as these will help you to revise what you have studied in class, in preparation for the end of unit assessments.

Your teacher will provide you with a separate Independent Learning Pack containing these worksheets.
